

GRID ANTENNAS FOR MOTOROLA CANOPY

Improve your radio performance with grid antennas with specially engineered arms to hold the Motorola Canopy radio. Largest selection of grid antennas now available on the market for 2.4, 5.2, and 5.7 GHz applications. Check with us for your antenna needs.

ICE

SNOW

wind

sleet

Be secure in your installation no matter what the weather may bring.

Windload specification for grid antennas is minimal 120 miles an hour.

**QUICK & EASY INSTALLATION WITH NEWLY ENGINEERED HARDWARE.
(Only one tool required for set-up!)**

**High gain = high performance with grid antennas.
From 12 - 30 dBi gain**

For areas with high signal level required for installation and no need of additional gain from antenna, use the new easy quick Motorola Canopy Universal Mount: UM-MC
