

WiMAX - 3.4 GHz Grid Antennas

GA34

| **24F**

Another plus when you choose **DMS WIRELESS** grid antennas: powder coated anodized steel brackets and clamps in hardware kit. All nuts and bolts are stainless steel. Another original from **DMS WIRELESS**: powder coated hardware.

Quality components for quality antennas make for quality installations. Buy original, tested and industry approved only from **DMS WIRELESS**.

DMS WIRELESS also manufactures sectors, grids, yagis, flat panels, omni antennas and universal mounts. Visit the WebSite www.dmswireless.com

The Original Design

For your **WiMAX** backhaul system or site applications, choose the ORIGINAL grid antenna now the standard for **WiMAX**: 3.4 GHz grid antennas from **DMS WIRELESS**.

Zinc plated cold rolled steel with polyester powder coat make for rugged and reliable construction for **WiMAX** applications. The passive feed, first in the industry and original design by **DMS WIRELESS**, has more UV stabilizer in the ABS plastic than any other feed available. The ultrasonic welded passive feed is complete with superior grade microwave cable and water resistant, lifetime guaranteed female N connector.
